SINGULARITYCOMPUTERS

SPECTRE 3.0
ENTERPRISE
SECOND PSU MOUNT

Manual

Revision 1.0

Introduction

The Spectre 3.0 Enterprise Second PSU Mount adds a secondary PSU mounting location at the front of the case. A front mounted radiator cannot be used when a second PSU is installed but Spectre 3.0 Enterprise has 5x 360mm radiator mounting positions and 3 of those are also compatible with the MO-RA 360. The second PSU is intended for when multiple GPUs are used and is for powering the GPUs, which means the cable runs can be clean with custom cables running directly into the GPUs. A 90-degree PSU power cable is included so that it can be routed under the case.

Specifications & Included Items

|	
Included Items	Spectre 3.0 Enterprise 2nd PSU Mount.
	90 Degree PSU Power Cable 600mm.
Fasteners	Stainless Steel. M4 x 12mm x 2. M4 Nuts x2.
Materials	CNC machined cast acrylic.
Manufacturing Process	CNC Router. 3D Printer.

Assembly

- Remove the PSU Bottom Shroud and replace it with the Spectre 3.0 Second PSU Mount.

- PSU support marked **1** can be moved to different locations depending on your PSUs connector and switch locations.

  Support Strut marked **2** is an optional item for builds with multiple GPUs and an extreme amount of weight.

- Attach the Spectre 3.0 Enterprise Dual PSU Mount to the Front Panel using the included M4 x 12mm x 2 fasteners. The PSU can be mounted afterward.

2x (M4 x 12mm) Fasteners

- There are 3 extra 2.5" drive locations marked in the diagram below along with the x4 inside of the PSU shroud.
