Introduction

The HAVN HS420 D5 Reservoir Distribution Plate fits onto any 420mm radiator mount but is specifically designed for the HAVN HS420. It is intended to be used instead of a radiator. It has an integrated reservoir, D5 pump top, D5 Pump Cover, Fill and Drain Ports. It is built from CNC machined clear cast acrylic and uses gaskets instead of O-Rings for increased durability. It is hand assembled with stainless steel fasteners. It has an integrated ARGB LED strip with an Accent Cover. There is also an optional Back Plate included to cover the rear side of the Rear Distribution Plate, so that you can't see the case panel behind it.

Specifications & Included Items

Distribution Plate	420mm D5 Reservoir Distribution Plate.
D5 Pump Cover	Protium 3.0 ARGB D5 Pump Cover.
Integrated LED Strip	ARGB 5V with 50cm cable.
Fasteners	Stainless Steel.
Gaskets	Silicone Black.
Materials	Cast Acrylic.
Manufacturing Process	CNC Router.
Assembly	Assembled by hand & pressure tested.
Packaged Dimensions	L: 420mm x W: 170mm x H: 150mm.
Packaged Weight	2.5kg.

i Important Information

Please make sure to use the included O-Rings when installing the pumps. Remove the pump covers from the distribution plate, install the O-Rings into the O-Ring grooves on the pump tops. Then push the pump into the pump top and screw the cover on. Tighten the pump covers down firmly. We strongly recommend pressure testing your build prior to filling the loop. Contact support@singularitycomputers.com with any questions.

Installation

Remove the covers marked in the image. The HAVN HS 420 D5 Reservoir Combo Distribution Plate installs into this location using the included fasteners.
